AGL SPRING SUMMER 2019 PRESS RELEASE

Travel is the inspiration for the AGL Spring/Summer 2019 Collection.

The Giusti sisters offer creations that seem suspended in an endless journey throughout time and space, in a time where distances become shorter and fashion is universally shared.

Travel is an integral part of the contemporary woman's life, she is always with a suitcase ready to go and a need to bring along unique footwear, ideal for all the seasons and perfect for any occasion.

Travel is also an escape for imagination, fed by fantasy and memories.

Sara, Vera and Marianna create their personal postcards, designing unique, evocative pieces, inspired by visited, or desired destinations. The color palette veers from soft desert sunset warm and neutral shades to exotic places bright tones and finally to international metropolises lights and contrasts.

Skyscrapers and large architectural works evoke elegant, abstract designs, like the maxi sole model with layers of cork, leather and natural rubber in fluorescent color, or linear, conceptual designs like the geometrical shaped ankle boot, wrapping the foot like a glove, a distinctive mark of AGL footwear.

Travel also occurs between times periods and cultures like gladiator sandals reinvented with a feminine contemporary style and military boots made graceful by maxi bows and transparent details.

A journey that begins in AGL workshops, where traditional Italian manufacturing techniques and technological progress meet in shaping high-quality footwear. A brand DNA representative Collection, possessing lightness and delicate femininity, respecting the family archives and AGL handmade strong tradition, offering iconic pieces.

Available in the best multi-brand boutiques.
